 - Experience must be within the **past 10 years**
 - Requires **35 hours of project management education/training**

PMP Exam

- 180 questions
 - 10 Unscored Questions
- 240 minutes to complete the exam
- Two 10-minute breaks

- Pass/Fail

PMP Exam Types

Case or Scenario: Review a detailed project situation and answer several questions based on it.

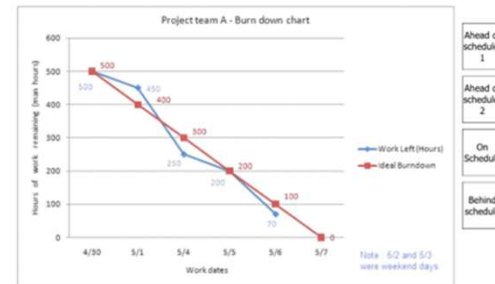

A project manager is working for a company that is launching a new smart home device designed to improve energy efficiency. The product aims to help consumers reduce their energy consumption by automatically adjusting heating, cooling, and lighting based on occupancy and time of day. The project manager has been given a budget of \$500,000 and a timeline of six months to complete the project. The project team consists of engineers, marketers, and sales professionals. A recent market analysis shows a growing demand for eco-friendly products, but competition is fierce with several established brands already in the market. Additionally, the company has set a goal to achieve a 10% market share within the first year of launch. The engineering team has identified several technical challenges, including ensuring compatibility with existing smart home systems and maintaining user privacy and data security. The marketing team is tasked with creating a compelling campaign that highlights the unique features of the product while addressing consumer concerns about privacy. The sales team is focused on establishing partnerships with retailers and online platforms to maximize distribution channels.	Based on the scenario, what are the key challenges the project manager might face in launching this product, and how should they be prioritized? ☐ A. Focus solely on marketing ☐ B. Overemphasize technical features ☐ C. Delay privacy measures ☐ D. Technical compatibility

PMP Exam Types

Enhanced Matching: Drag and match items, sometimes using images, diagrams, or charts.

Using the project status boxes located on the right side, drag each box to a point on the burn down chart where the project indicates that status. Ensure that each box corresponds to a specific point on the chart before moving to the next question.

PMP Exam Types

Graphic-Based Questions: Read a chart, graph, diagram, or image and answer questions from it.

The screenshot shows a software application window titled "Requirements Traceability Matrix (RTM) - Excerpt from Project Plan". The window contains a table with two columns: "Requirement ID" and "Requirement Description". The table lists six requirements (RQ001 to RQ006) with descriptions related to Salesforce Service Cloud implementation. To the right of the table, there is a text block describing the business context and a multiple-choice question.

Requirement ID	Requirement Description
RQ001	Salesforce Service Cloud (SFSC) out-of-the-box functionality for B2B customer service immediate issues with BSC staff using SFSC instead of email.
RQ002	Accelerate email deflection, reducing the number of emails requiring CSA intervention.
RQ003	Improve email resolution speed, ensuring timely customer responses.
RQ004	Advanced analytics including BI and solution usage visibility.
RQ005	AI automated case classification, best reply generation, and case summarization.
RQ006	CSAT surveys after each case and automated escalations.

The high staff turnover at the Business Solutions Center (BSC) has caused significant frustration among B2B customers, primarily due to the loss of historical information stored in Outlook emails. To mitigate this issue, the BSC is adopting Salesforce Service Cloud (SFSC) to enhance the visibility and management of customer queries, along with offering other capabilities. The project is expected to deliver \$10 million annually according to the annual planning exercise, but the business case presented only demonstrated \$4 million in benefits. Consequently, the business sponsor needed to address concerns from the Business Transformation Office (BTO) and engage with the agile practitioner for clarification.

Which specific requirements within the Salesforce Service Cloud implementation contribute the MOST to the \$4 million in reduced benefit?

- ☐ A. RQ001
- ☐ B. RQ002
- ☐ C. RQ003
- ☐ D. RQ004
- ☐ E. RQ005
- ☐ F. RQ006

Taking the Exam

- **In-Person Testing Center (Vue)**

- Pro:
 - No special equipment or room
- Con:
 - Longer to get dates
 - Traveling to testing center
 - Not your space

OR

- **Live Online Proctor Exam**

- Must have:
 - Webcam and Mic (most laptops)
 - Stable internet connection
 - Quiet Room
- Pro:
 - Lots of dates
 - Your Space
- Con:
 - Equipment failure
 - Distractions

PMP Exam Content

“Approximately 40% of the items will represent predictive project management approaches, whereas the remaining 60% will be divided between adaptive/agile and hybrid management approaches.”

Domain	Percentage of Items
1. People	33%
2. Process	41%
3. Business Environment	26%
Total	100%

The **2026 PMP Exam Content Outline** has **26 total tasks**:

- People**: 8 tasks
- Process**: 10 tasks
- Business Environment**: 8 tasks

Secret to Passing

1. Do not apply your work experience
2. Understand the concepts and don't memorize them
3. Apply the PMP Mindset
(Last Section of this Class)

Maintaining the Certification

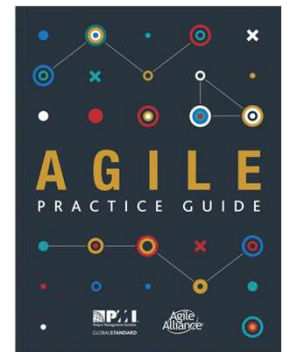

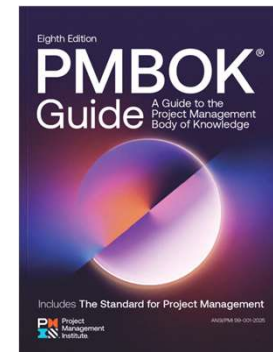

- Must obtain **60** Professional Development Units (PDUs) in a three-year period.
- Professional Development Units
 - Take classes
 - Attend the PMI meetings
 - Work experience
- Fail to maintain 60 PDU's you lose PMP certification
 - Must resubmit application
 - Must retake exam

Course Certificate

- Complete all videos and practice exams.
- Follow the directions in the last lecture (Bonus Lecture), to request your PMP course completion certificate from TIA.
- Do not request the certificate until you have fully completed the class.

Course Content Sources
