Dao Quang Hoa

Project Manager

Dob: 27/07/1997
Gender: Male
Phone: 0775987268
Email: daoquanghoa1997@gmail.com
Website: facebook.com/dqhoa99
Address: Dong Quan, Dong Hung, Hung Yen

OBJECTIVE

I have a strong technical background and the ability to quickly absorb new knowledge, particularly in technology products and solutions. With hands-on experience in software development and project coordination, I am now aiming to grow into a professional Project Manager role, where I can bridge technical expertise with business objectives and stakeholder management. I am proactive, highly responsible, and results-oriented, with a strong focus on delivering projects on time and meeting quality standards. I communicate effectively with clients and cross-functional teams, and I adapt quickly to changing requirements in dynamic environments.
I am committed to continuous learning and improving my leadership, planning, and risk management skills, with the goal of building a long-term career as a professional Project Manager in a structured and high-performing organization.

EDUCATION

2015 - 2020

Posts and Telecommunications Institute of Technology
Electrical and Telecommunications Engineering
Achieved **First Prize** in the 2019 Scientific Research Competition with the project titled **"Autonomous Line-Following Vehicle."**

WORK EXPERIENCE

2019 - 2020

COMIT Corporation
Business Intern

- Identify and acquire new customers through channels such as LinkedIn, Facebook, Zalo, and email marketing to expand the customer network and increase brand awareness.
- Research, consult, and develop clients with needs for AI camera–based smart attendance systems.

2020 - 2022

FPT Software
Software Engineer
Project 1: Document Reading Application (Japan Market)

- Designed and executed test cases to ensure product quality before release
- Performed testing, identified issues, and reported bugs in a timely manner
- Collaborated with the team to improve user experience

Project 2: Printer Interface – Client: Fujixerox

- Worked with the team leader to analyze and clarify client requirements
- Prepared system specification documents
- Developed program logic based on requirements
- Implemented the application using **MFC (C++)** for Windows-based printer interface development
- Created and executed test cases, conducted system testing
- Ensured the product met requirements and delivery timelines

2022 - 2024

FPT Software
Project Team Leader

- Managed a software development team of 11 members
- Worked directly with clients to gather and clarify project requirements
- Estimated workload and assigned tasks to team members
- Resolved complex issues during project implementation

2024 - 2026

FPT Software

Project Manager

- Managed and coordinated two parallel software projects for the Japanese market (01 maintenance project ~10 members, 01 development project ~15 members), ensuring alignment between product development, clients, and offshore teams
- Worked directly with clients to analyze and clarify requirements, ensuring alignment with business objectives
- Managed project scope, allocated resources, and tracked progress to meet deadlines and quality standards
- Applied a hybrid Waterfall–Agile model: using Waterfall for planning and documentation phases, and Agile (Scrum) for iterative development, improving flexibility and delivery efficiency
- Supported project management activities: coordinated cross-team tasks, consolidated reports, and monitored progress
- Reviewed bug-fixing solutions, ensuring compliance with testing processes and product quality standards
- Actively contributed to testing and coding, supporting the team in resolving technical issues
- Helped establish working environments to improve team efficiency and operational performance
- Proactively communicated with clients, providing progress updates and addressing issues promptly
- Monitored team performance, managed resources, and optimized project workflows

2026 - Now

Aladin Technology

Project Manager

- Managed an AI Chatbot project for Viettel, overseeing the end-to-end delivery lifecycle
- Analyzed and clarified client requirements to estimate workload, project scope, and Man-Months (MM)
- Allocated project resources, managed personnel, and optimized team capacity
- Established and managed project workflows on Jira, including creating Epics, defining Sprints, and tracking tasks
- Facilitated daily stand-ups and checkpoint meetings to align team direction and monitor daily progress
- Conducted weekly progress reviews and delivered status reports to clients and key stakeholders
- Evaluated team performance, conducted periodic reviews, and provided actionable feedback
- Led the project acceptance and handover process, ensuring all deliverables met client standards and technical requirements

ACTIVITIES

2023 - 2026

Employee Engagement Activities

Leader

- Organized and coordinated cultural and team-building activities to foster a dynamic and cohesive work environment
- Planned and executed internal events such as Year-End Parties (YEP), company trips, and employee birthday celebrations
- Trained and onboarded new team members to improve overall team performance
- Developed and implemented employee engagement plans to enhance employee experience
- Handled administrative tasks related to projects, including organizing company trips and preparing holiday gifts for employees
- Collaborated with different departments to ensure activities were delivered effectively and on schedule
